CONFIDENTIAL

Patient:

You have been scheduled for an overnight sleep study (polysomnogram) with CPAP at the St. Anthony's Hospital Sleep Disorder's Center.

You should check in at the **St. Anthony's Sleep Disorders Center by 8:30 p.m. (enter through the ground floor parking garage)**. You will be finished with the test and ready to leave by no later than 6:30 a.m. the following morning. Before the test, you will be shown a video about the treatment of sleep apnea and your questions will be answered. You will not have to view this video again if you saw it during a previous stay at our Sleep Center. You will be hooked up to some wires before bedtime (11:00 p.m.). You will be able to get out of bed during the night if necessary. **** If you're currently using CPAP/BiPAP, you must bring your supplies with you but DO NOT have to bring your machine.****

A map and instructions to follow before your sleep study are enclosed. If you are scheduled for a nap study the next day please read the attached information sheet.

If you cannot keep this appointment, you must contact our scheduling office 48 hours prior to your study date. If your normal sleeping hours **are not** during the night due to your work schedule, please contact our office as soon as possible. The scheduling office is open Mon. – Fri., 8:00 a.m. – 3:00 p.m., phone (727) 820-7424.

Preparing for a Sleep Study

INSTRUCTIONS TO FOLLOW THE NIGHT/DAY BEFORE YOUR SLEEP STUDY:

1. **Keep your usual bedtime** schedule the night/day before your study.
2. **Avoid “sleeping in” or napping** on the day of your study.
3. **Avoid any activities that may interfere with your sleep** on the night/day of your study.
4. **Avoid any beverages or food items containing caffeine** on the day/night of your study.
5. **It is best to avoid alcohol for 1 week** prior to your study.
6. **Take all medications as prescribed by your physician unless told otherwise by your physician.**
**Bring prescribed medications, over-the-counter products, head-ache medicines, diabetes supplies and breathing treatment supplies that you need to take or use at night with you in its original labeled bottle/package, we are not a nursing department and do not have medications on hand. **If you are taking any sleeping medications, we recommend that you do not drive following the test.
7. **You should shower and wash your hair** prior to coming to the Sleep Center, **do not** use any oils, mousse, tonics or hairspray on your hair.

WHAT TO BRING:

1. **You must bring your Insurance Card, Photo ID and your Sleep Study Prescription** (if you have one).
2. **Bring loose comfortable clothing to sleep** in (i.e. pajamas, a baggy sweat suit, or shorts and a T-shirt). Long nightgowns are not suggested they may interfere with testing. Technologist reserve the right to not perform the sleep study if you **DO NOT** bring sleeping clothes with you. Sleeping in the nude is **NOT** permitted.
3. **Bring any toiletries** you may want before/after the study. There are restrooms and a shower in the Sleep Disorders Center.
4. **Please eat your evening meal/breakfast before arriving.** Bring any special diet snack foods that you may require before bed. We will have light snacks and ice water, juice, hot decaf coffee or tea available. If you are scheduled for daytime testing the following day, breakfast and lunch will be provided. Please let us know in advance if you require a special diet (i.e. diabetic, vegetarian, etc.).
5. Bring any items such as **a good book or favorite pillow** that will make your stay more comfortable. A TV is located in the patient living room for viewing. Bedtime will be no later than 11:00 PM/8:00 AM.
6. **Do not bring any jewelry or valuables with you.**

WE REQUIRE 48 HRS. NOTICE TO CANCEL OR RESCHEDULE YOUR APPOINTMENT

Female

Other than just feeling tired, how likely are you to doze off or fall asleep in the following situations? This refers to your usual way of life in recent times. Even if you have not done some of these things lately, try to work out how they would have affected you.

Use the following scale to choose the *most appropriate* number for each situation:

0 = Would **never** doze

1 = **Slight** chance of dozing

2 = **Moderate** chance of dozing

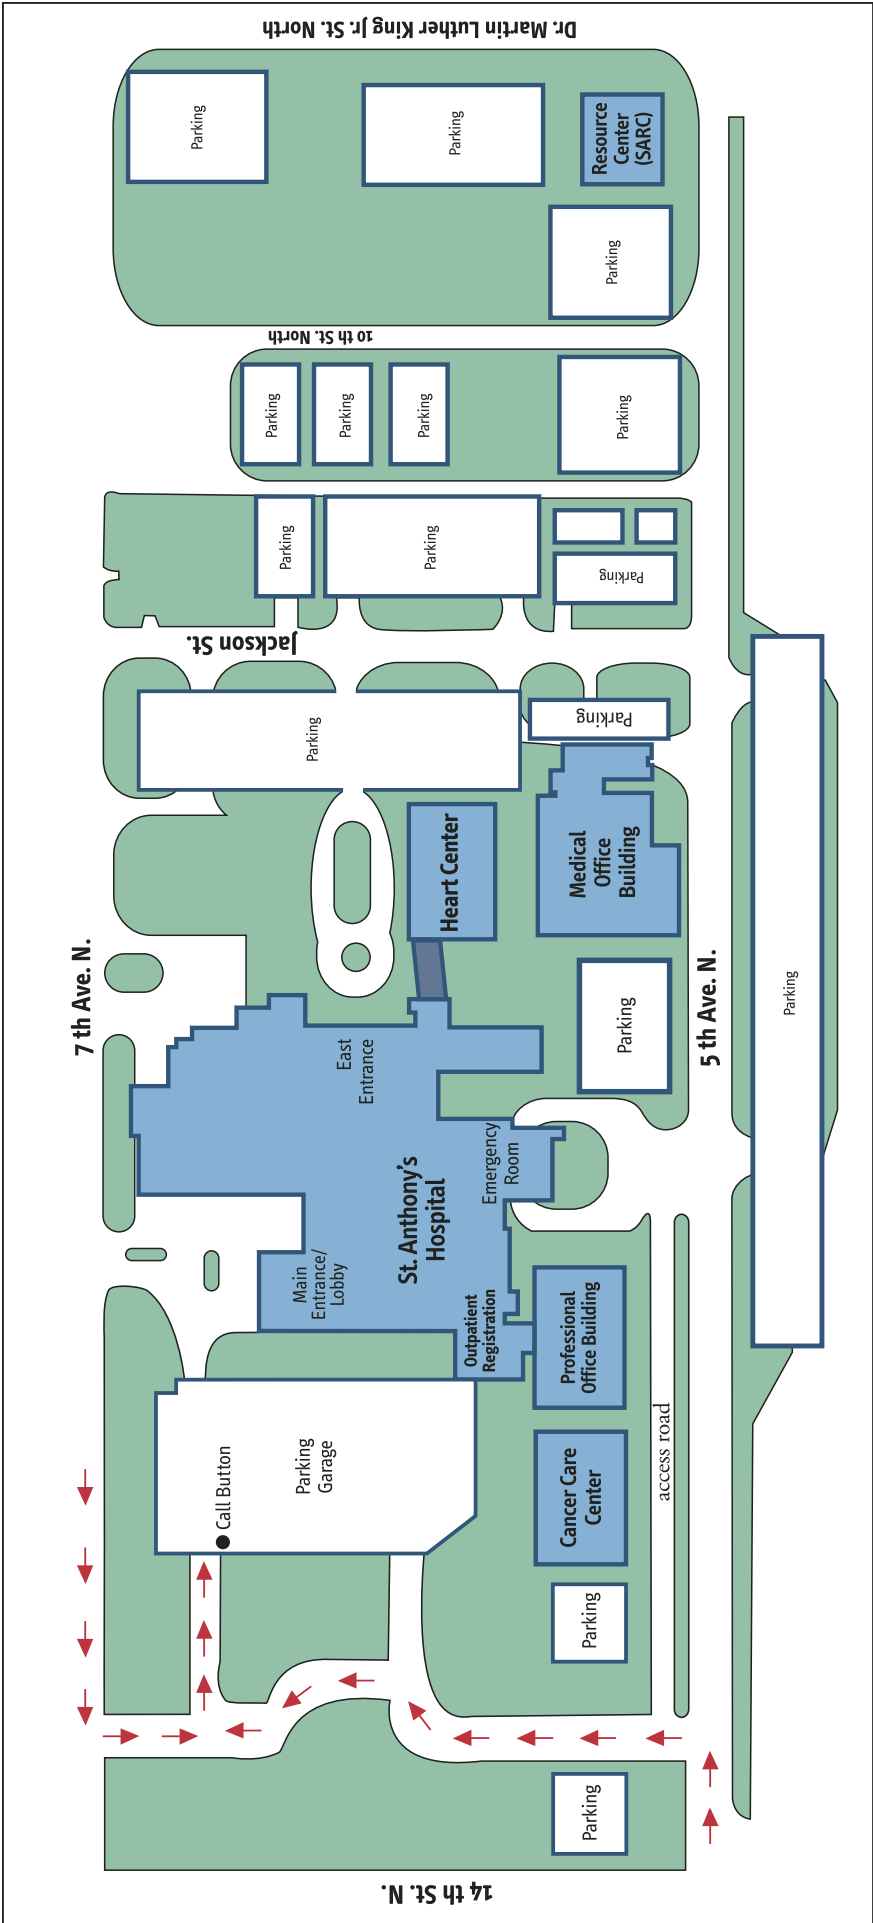

3 = **High** chance of dozing

<u>Situation (circle the most appropriate number)</u>	<u>Chance of Dozing</u>
